

Step 1 — Missing Value Analysis

The screenshot shows a Microsoft Excel spreadsheet with a dataset of 20 product observations. The columns are: Product ID, Product Name, Brand Name, Price (\$), Quantity, Category, Missing Value Analysis, Before Cleaning, and After Cleaning. The 'Missing Value Analysis' column identifies missing values in the 'Price' and 'Category' columns. The 'Before Cleaning' column shows the count of missing values for each row. The 'After Cleaning' column shows the count of missing values after correction. The formula bar shows the formula =COUNTBLANK(F2:F35).

20											

Observation

Identified missing values in the dataset. The 3 missing Price values were kept blank, while the missing Category values were corrected.

Corrected inconsistent Product Name and Category values to maintain clean and consistent data.

Observation: Corrected inconsistent Product Name and Category values to maintain clean and consistent data.

Step 3 — Duplicate Removal

Microsoft Excel

3 duplicate values found and removed; 31 unique values remain. Note that counts may include empty cells, spaces, etc.

Product ID was split into Manufacturing Date and Country Code. Product Brand was created by combining Brand Name and Product Name.

Observation: Product ID was split into Manufacturing Date and Country Code. Product Brand was created by combining Brand Name and Product Name.

Step 5 — Price Currency Formatting

The screenshot displays the Microsoft Excel interface. The ribbon at the top includes the 'Number' tab, which is active, showing the 'Currency' dropdown menu. The formula bar shows the value '1000'. The worksheet contains a table with 13 columns: Product ID, Product Name, Brand Name, Price (\$), Quantity, Category, Missing Value Analysis, Before Cleaning, After Cleaning, Manufacturing Date, Country Code, and Product. The 'Price (\$)' column contains values formatted as currency, such as \$1,000.00, \$80.00, \$130.00, \$900.00, \$70.00, \$30.00, \$90.00, \$500.00, \$130.00, \$950.00, \$90.00, \$120.00, \$150.00, \$250.00, \$50.00, \$160.00, \$980.00, and \$150.00. The 'Before Cleaning' and 'After Cleaning' columns contain numerical values. The 'Manufacturing Date' column contains dates in YYYY-MM format. The 'Country Code' column contains two-letter codes. The 'Product' column contains the product name and brand name. The status bar at the bottom shows 'Ready' and 'Accessibility: Good to go'.

Observation

Price values were formatted consistently as currency for clear and professional presentation.

Observation: Price values were formatted consistently as currency for clear and professional presentation.

Step 6 — Price Data Bars & Electronics Highlighting

Observation

Data Bars were applied to the Price column, and Electronics category values were highlighted for easy identification.
